To Whom It May Concern,

Corporate Business Brokers operates a professional mergers and acquisitions business with ten staff using laptops and PCs in a server network. Our activities are demanding and time sensitive and rely heavily on effective information and telecommunications technology.

We have used several IT service providers in the past with limited success but in 2006 we selected Pronet Technology to manage our IT requirements.

Pronet's attractions to us include competitive service pricing, responsiveness to operational problems and advice ensuring the reliability and development of our network. In particular, Pronet's pre-paid, remote access Support Genie service provides all our staff with immediate access to service problem resolution. This is very important for productivity in a fast-paced business environment.

Pronet's management and their technical and administrative staff and management handle our relationship in a competent and professional manner. They provide proactive advice and persist with difficult issues until resolved. Furthermore, they work to co-ordinate their service activities in ways that minimize our company's downtime.

Yours sincerely,

Partner
